Contd

Dear Paul, while enclosed 62-109060-5806 should interest you in other ways, I draw your attention to its statement that Barrett was DL's photo expert in the JFK assassination and then remind you of that strange business of Lifton's assult on me and my work to the NY Times, based on an invalid assumption that Barrett was ignorant of matters photographic. The Harm Lifton then did is great. Its effects continue. Of course I've always wondered why...I've not included other records. It was finally decided that Life did have the original. Interesting that over many pages the photog. is never identified in any way, especially not by name. HW 11/26/79
